How can a container be used for energy storage?

Containers can be placed together to create even larger energy storage banks(1MW with 2,1.5MW with 3 etc.) One of the largest energy storage battery systems available! Every solar storage system requires an effective battery bank that can help in storing the energy and using it to the utmost later on.

Why should you choose a modular energy storage container?

Advanced monitoring systems and IoT integration ensure optimal performance and remote management capabilities. The modular design allows for easy expansion,with the option to expand the battery storage system by 100 - 500kwh,making our energy storage container perfect for meeting growing energy demands.

How long does it take to ship a solar container?

Standard solar container models can be manufactured and ready to ship in as little as 4-6 weeks. Customized configurations can take up to 8-10 weeks,with shipping times varying by destination. Do you offer after-sales support for mobile solar PV containers?

How much does a container weigh?

Each container with all of the equipment will weigh less than 16 tons. Fully tested before being shipped. Factory will provide free installation support and after sales service. Production time is 4-6 weeks. Estimated delivery time to job site is 10 weeks via Ocean and Truck transport.
