What are the exterior lights on a shipping container?

Our solar-powered exterior lights are motion-activated and three times brighter than standard lights, enhancing security around the container. For the interior, we offer rechargeable lights with three brightness levels, designed to illuminate even large storage areas. How are the exterior lights mounted to the shipping container?

Can additional lighting be installed after a storage or office container?

Yes, additional lighting and other accessories, such as mini blinds and shelving, can be delivered and installed after your storage or office container has been set up, offering flexibility as your needs evolve.

Are solar-powered shipping container lights energy efficient?

All our powerful lighting options are energy efficient and designed to meet the standards of both public and private projects. Our durable, solar-powered exterior shipping container lights are three times brighter than standard solar lights. They enhance the security around the outside of your container or office.

Do you offer interior lights for your shipping container?

The interior lights we offer for your shipping container are rechargeable, versatile, and offer three different levels of brightness for the inside of your office or storage area at any time of day. These lights have an 82-foot beam distance, so they can illuminate your entire storage area with ease.
