-----

Engineered Solutions for a Perfect Application Fit specific requirements and challenges. AKG's engineering and design teams are well trained and experienced to create cooling systems that ...

In order to ensure the secure and stable operation of wind turbine, effective cooling systems has to be implemented to these components. Since the early wind turbines had lower power ...

Discover expert strategies to optimize cooling systems in wind turbines, enhancing performance and reliability.

With its innovative solutions for brakes, hydraulic power unit (HPU) parts and rotorlocks, the company has taken up the challenge of creating a cooling system for wind turbines.

Components, Systems and Service for Wind Turbines. Your Professional Partner for Wind Turbines. With over 7,500 employees is one of the leading suppliers hydraulic and electronic ...

The ability to strengthen products for any environment is an ideal skillset to ruggedize future wind-turbine-pumped, two-phase systems for harsh weather environments and corrosion potentials ...

ICARUS develops complete and customized cooling systems that efficiently manage the heat within wind turbine nacelles.

Maximize wind turbine performance with Heatex's complete and customizable cooling systems for generator, nacelle and converter/ transformer cooling.

Wind energy is a key component of the global energy transition. However, to ensure reliable and efficient operation of wind turbines, all components must be optimally cooled.

Optimize the layout of heat pipes, manufacture and install prototypes to verify the cooling system. In order to solve the problem of excessive temperature rise caused by 2.5 WM ...
