A deep analysis into state-of-the-art docking systems for drones and unmanned aerial vehicles (UAVs) that provide reliable and ...

Drone-in-a-box (DiaB) systems, also known as droneports, provide an all-in-one enclosed solution for battery-powered UAVs (unmanned aerial vehicles) that incorporate a ...

CakeBoxx shipping container solutions for unmanned vehicles and autonomous vehicles such as UUV, UGV and UAV.

A more promising solution, however, seems to be docking stations that are capable of recharging (or swapping) batteries, storing and even communicating with a UAV. Using ...

For this reason, we have chosen to develop a universal, lightweight and affordable design of wireless drone docking station and associated drone charging station that can be used in a ...

Drone docking stations and drone ports allow UAVs (unmanned aerial vehicles) to take off and land, and also provide a recharging capability for the aircraft. They are typically ...

A deep analysis into state-of-the-art docking systems for drones and unmanned aerial vehicles (UAVs) that provide reliable and consistent docking/undocking in all conditions.

We present a rapidly deployable foldable multi-rotor prototype, called ALIENER, which is designed to have a smaller fold size and greater load capacity and to allow more space for ...

Description [0001] The invention relates to an automatic payload shipment system with an unmanned aerial
