-----  
Where are solar street lights made?

While they have production facilities in Asia and the Middle East, they are committed to producing "Made in USA" products where imported materials only make up a small fraction of the final product cost. Their solar street lights are highly efficient, producing up to 130 lumens per watt.

Are solar powered lighting systems a win-win option?

At a time where there is continuing pressure for companies and organizations to go green and be more environmentally friendly, a solar powered lighting system is a win-win option. Solar Illuminations offers a large selection of commercial solar-powered lighting systems.

Is solar lighting the future of sustainable lighting?

Solar lighting represents the future of sustainable illumination, yet adoption remains gradual due to upfront costs and existing electrical infrastructure. While retrofitting traditional fixtures is simpler, solar lighting offers long-term energy independence, reduced operational expenses, and environmental benefits.

Should you install a self-contained outdoor solar lighting system?

Rather than going through the expense and hassle of trenching electric wires, you can install a self-contained outdoor solar lighting system. In addition to initial installation cost savings, solar energy systems are a lighting solution that do not require a monthly electric or meter bill, and require little to no regular maintenance.
