-----  
What are the approval procedures for equipment authorization?

The Commission has two different approval procedures for equipment authorization - Certification and Supplier's Declaration of Conformity (SDoC). The required procedure depends on the type of equipment being authorized as specified in the applicable rule part.

Is equipment authorized under the sdoc procedure listed in a commission database?

Equipment authorized under the SDoC procedure is not listed in a Commission database. However, the responsible party or any other party marketing the equipment must provide a test report and other information demonstrating compliance with the rules upon request by the Commission.

Who is not required to file an equipment authorization application?

The responsible party, who must be located in the United States, is not required to file an equipment authorization application with the Commission or a TCB. Equipment authorized under the SDoC procedure is not listed in a Commission database.
