What is NYCIDA's largest battery energy storage project?

NYCIDA closed its largest battery energy storage project to date, the East River Energy Storage Project, located on an industrial site on the East River in Astoria, Queens. When built, the facility will be able to hold up to 100 megawatts (MW) and power over tens of thousands of households.

Are battery energy storage systems permitted in a zoning district?

Tier 1 Battery Energy Storage Systems shall be permitted in all zoning districts, subject to the Uniform Code and the "Battery Energy Storage System Permit," and exempt from site plan review. 7. Permitting Requirements for Tier 2 Battery Energy Storage Systems

What is the battery energy storage system guidebook?

The Battery Energy Storage System Guidebook (Guidebook) helps local government officials, and Authorities Having Jurisdiction (AHJs), understand and develop a battery energy storage system permitting and inspection processes to ensure efficiency, transparency, and safety in their local communities.

What if I have any questions about the battery energy storage system permit?

If you have any questions about the Battery Energy Storage System Model Permit, please email questions to [cleanenergyhelp@nyscrda.ny.gov](mailto:cleanenergyhelp@nyscrda.ny.gov) or request free technical assistance at [nyscrda.ny.gov/Energy-Storage-Guidebook](https://nyscrda.ny.gov/Energy-Storage-Guidebook). The NYSCRDA team looks forward to partnering with communities across the State.

A battery energy storage system (BESS), battery storage power station, battery energy grid storage (BEGS) or battery grid storage is a type of ...

New York City's largest battery storage facility will replace a natural gas peaker plant unit retiring in 2025.

They are older power plants that are costly to maintain and powered by fossil fuels and only operate when New York State experiences "peaks" in energy demand.

As an important first step in protecting public and firefighter safety while promoting safe energy storage, the

New York State Energy Research and Development Authority (NYSERDA) ...

A battery energy storage system (BESS), battery storage power station, battery energy grid storage (BEGS) or battery grid storage is a type of energy storage technology that uses a ...

Once completed, the project will be the largest battery storage installation in New York City. The facility will be able to power ...

The project will include two separate battery energy storage systems capable of charging from and discharging into the New York power grid and a solar canopy system ...

Once completed, the project will be the largest battery storage installation in New York City. The facility will be able to power more than 10,000 households during peak demand ...

The project will include two separate battery energy storage systems capable of charging from and discharging into the New York ...

Plans were announced to transform the site of the old Arthur Kill Power Station on Staten Island into the city's largest battery storage facility. When complete, the 60-megawatt ...

They are older power plants that are costly to maintain and powered by fossil fuels and only operate when New York State experiences "peaks" in ...

When built, the facility will be able to hold up to 100 megawatts (MW) and power over tens of thousands of households. Once completed, the project will be amongst the largest ...
