Will new 500 kV and 230kV transmission lines help Laos?

VIENTIANE, April 22 (Xinhua) -- The new 500 kV and 230 kV transmission lines to be installed in Laos' capital Vientiane, a joint project between Lao and Chinese companies, will ensure more Lao people to have sufficient power, officials here have said.

How will Vientiane's Electricity Project Impact Laos?

The project will create a sustainable electricity supply for the development of Lao capital Vientiane and increase the capacity of Laos' electricity grid," said Yu Jun, general manager of the China Electric Power Equipment and Technology Co., Ltd., the Chinese EPC contractor.

Are Chinese infrastructure projects saddling Laos in debt?

And there are numerous global examples of large Chinese infrastructure projects saddling the smaller host country in unmanageable amounts of debt. Laos, in response to rising debt, recently signed a deal ceding control of the majority of its power grid to a state-owned Chinese company.

A groundbreaking ceremony for the China-Laos 500 kV Interconnection Project was held in the Lao capital of Vientiane on February 26, 2025. A major initiative under the China-Laos ...

Phoxay Sayasone, Laos' Minister of Energy and Mines, explained that the system will connect Laos' power grid with neighboring countries, including Thailand, Vietnam, ...

The project includes the construction of a new 500-kV substation in Laos, a 183.5-km cross-border transmission line linking Namor in Oudomxay, Laos, with Xishuangbanna in ...

Laos, in response to rising debt, recently signed a deal ceding control of the majority of its power grid to a state-owned Chinese company. The Monsoon Wind Power Plant ...

This marks the first large-scale solar PV project in Laos. The Northern Laos Interconnected Clean Energy Base Project, developed by ...

Operated by the EDL-T, a joint venture of China Southern Power Grid (CSG) and Lao state-run Electricite du Laos (EDL), the Thavieng-Mahaxay project is expected to ...

The project is a collaborative project between EDL and the China Electric Power Equipment and Technology Co., Ltd., a company affiliated to the State Grid Corporation of China.

This marks the first large-scale solar PV project in Laos. The Northern Laos Interconnected Clean Energy Base Project, developed by CGN, is a key supporting power ...

Wait, no - it's Laos' first grid-scale storage facility using Huawei's latest grid-forming inverters. These devices essentially teach old power grids to speak renewable energy's language.

The project includes the construction of a new 500-kV substation in Laos, a 183.5-km cross-border transmission line linking ...

The launch ceremony for the construction of the Lao section of the China-Laos 500 kV power interconnection project was held in Lao capital Vientiane on Wednesday.
