How much does a 20kW Solar System cost in Australia?

Across Australia, a quality 20 kW array installed on a standard iron or tiled roof with no major upgrades falls between \$15 000 and \$22 000, including GST and the federal STC incentive. That headline range converts to roughly \$750 - \$1 100 per installed kilowatt. How many panels are in a 20kw solar system? How much area is required?

What is a solar powered shipping container?

At SCS Australia, we create solar powered shipping containers that combine renewable energy technology with the strength and mobility of a shipping container. These self-sufficient units are ideal for powering off-grid operations, mobile businesses, events, and remote projects--all while reducing carbon footprint and cutting energy costs.

How much does a 20 kW solar system cost?

In 2016, a 20 kW array routinely cost ~ \$32 000 (? \$1.60 /W), matching the \$1.62 /W national average recorded that December. By mid-2025, bulk pricing sits near \$0.90 /W, halving nominal system cost to ~ \$18 000. The drop stems from cheaper modules, a stronger STC market, and intense installer competition.

What is a solar container build?

It's a modified shipping container built to house solar panels, batteries, inverters, and other off-grid power systems. These units are ideal for powering remote sites, construction camps, emergency setups, or as a portable backup energy system. What's included in a solar container build?

This article provides an overview of the ranges of prices, energy yields (in kWh), and financial returns that a business may expect ...

Across Australia, a quality 20 kW array installed on a standard iron or tiled roof with no major upgrades falls between \$15 000 and \$22 000, including GST and the federal STC incentive.

The container shipping costs can vary with a 20 ft and 40 ft container type. Here is the table for consumers to
