Can electric cars make transport more sustainable in Costa Rica?

President Carlos Alvarado Quesada sees electric cars as key to making transport more sustainable in Costa Rica. The National Decarbonisation Plan has big goals for electric vehicles. It wants 70% of buses to be electric by 2035 and 100% by 2050. For light vehicles, the goal is 60% zero-emission by 2050, with 25% electric by 2035.

What is Costa Rica planning for electric cars?

Costa Rica is planning big for electric vehicles. They want to build a strong system for electric cars. This includes making more charging stations and improving the ones we have. The government wants to make it easier to use electric cars. They plan to add more charging spots and update old ones.

Are electric cars becoming more popular in Costa Rica?

Electric vehicle adoption in Costa Rica is growing fast. By 2023, the number of electric cars on the road jumped by 300% from the year before. Over 5,000 electric vehicles were registered in 2022, showing a big move towards green transport. The country's focus on renewable energy is key to this shift.

Why is Costa Rica a leader in green transport?

President Quesada is pushing for green taxes and climate change education. The government is building a strong e-mobility network. It has over 100 public charging stations in cities like Cartago and Guanacaste. These steps make Costa Rica a leader in green transport. It also boosts the electric vehicle market.
