Does Cyprus have a battery energy storage system?

Cyprus's electricity regulator has approved plans to install 400MWh of battery energy storage system (BESS) projects in the Mediterranean island country. Cyprus Energy Regulatory Authority (CERA) announced the approval earlier this week (18 June) of three projects which will be owned and operated by the Cyprus Transmission System Operator (TSOC).

Will Cyprus install 400MWh battery energy storage system?

Image: Cyprus government /MECI. Cyprus's electricity regulator has approved plans to install 400MWh of battery energy storage system (BESS) projects in the Mediterranean island country.

How is Cyprus developing pumped hydro energy storage capacity?

The country is also seeking to develop pumped hydro energy storage (PHES) capacity with technical assistance from the European Commission (EC) and is formulating a National Hydrogen Strategy. Cyprus's electricity regulator has approved plans to install 400MWh of battery energy storage system (BESS) projects.

Is Cyprus facing a unique set of energy challenges?

In a keynote address to open a conference on energy storage and hydrogen in March, George Papanastasiou of the Ministry of Energy, Commerce and Industry (MECI) noted that Cyprus faces a "unique set of energy challenges, which require tailored solutions."

In May 2025, Cyprus successfully commissioned its first significant battery energy storage system (BESS), marking a major step toward enhancing the country's energy ...

The energy regulator has approved a significant battery storage system totalling 120MW across three locations to enhance grid stability and security, marking a crucial step for ...

Cyprus is set to expand its energy infrastructure with new storage facilities and power generators, Giorgos Petrou, president of the Cyprus energy regulatory authority (Cera) ...

Cyprus is poised to introduce large-scale renewable energy storage solutions by 2026, a move aimed at

addressing the nation's increasing demand for effective energy ...

The government plans to complete a new energy storage system, along with storage installations at two Electricity Authority of Cyprus (EAC) power plants, by June 2026, ...

Cyprus's electricity regulator has approved plans to install 400MWh of battery energy storage system (BESS) projects.

In an ambitious move towards a sustainable energy future, Cyprus is set to operationalize its first large-scale electricity storage system within the next 16 months.

In May 2025, Cyprus successfully commissioned its first significant battery energy storage system (BESS), marking a major step ...

Cyprus' Department of Environment has approved a project for what is set to become one of the country's first battery energy storage systems with HESS Hybrid Energy ...

Cyprus is set to build its first large-scale electricity storage system within the next 16 months, according to Energy Minister George Papanastasiou. This move is key to ...

Cyprus' Department of Environment has approved a project for what is set to become one of the country's first battery energy storage ...

Cyprus is set to expand its energy infrastructure with new storage facilities and power generators, Giorgos Petrou, president of the ...
