Can the Democratic Republic of the Congo produce lithium-ion battery cathode precursor materials?

London and Kinshasa, November 24, 2021 - The Democratic Republic of the Congo (DRC) can leverage its abundant cobalt resources and hydroelectric power to become a low-cost and low-emissions producer of lithium-ion battery cathode precursor materials.

Is DRC a good destination for sustainable battery manufacturing?

Study identifies DRC as a favorable destination for the manufacturing of sustainable battery materials used in high-nickel batteries

How does the DRC influence the global battery supply chain?

Mining policy decisions made by politicians in the DRC's capital Kinshasa or mining regions like Kolwezi are felt throughout global battery supply chains. For instance, as the producer of 70% of the world's cobalt, the DRC has influence over the global electric vehicle battery supply chain.

Does the Democratic Republic of the Congo influence the cobalt market?

The mineral-rich Democratic Republic of the Congo (DRC) is often portrayed as a victim of exploitation by China, the US and Europe in their competition for its minerals, which are critical for the energy transition. But our research has found that the DRC can influence the shape of the cobalt market, in which it is the single largest producer.

Since 2021, the DRC has taken significant steps to establish a regional battery industry, driven by rising global demand for key battery ...

As demand for electric batteries surges, communities in the Democratic Republic of Congo are facing harsh consequences.

Study identifies DRC as a favorable destination for the manufacturing of sustainable battery materials used in high-nickel batteries.

Global equipment manufacturer Caterpillar has supplied hybrid energy solutions technology including 7.5MW of battery storage to the microgrid powering a gold mine in the Democratic ...

As the Democratic Republic of Congo (DRC) seeks to overcome chronic energy shortages, energy storage systems are emerging as game-changers. This article explores how ...

Some battery companies have decided to ban all ASM cobalt in their batteries, demonstrating their commitments for more ethical ...

Since 2021, the DRC has taken significant steps to establish a regional battery industry, driven by rising global demand for key battery minerals such as cobalt, nickel, ...

The Democratic Republic of Congo is the world's major supplier of cobalt, used in electric vehicle batteries, and is asserting its ...

Some battery companies have decided to ban all ASM cobalt in their batteries, demonstrating their commitments for more ethical considerations. However, this is difficult to ...

The Democratic Republic of Congo is the world's major supplier of cobalt, used in electric vehicle batteries, and is asserting its rights as an equal partner in the renewable energy...

Today, DRC cobalt is shipped to China, which accounts for 65% of all global cobalt processing into cathodes for lithium-ion batteries (rechargeable batteries). China is also the ...

Today, DRC cobalt is shipped to China, which accounts for 65% of all global cobalt processing into cathodes for lithium-ion batteries ...
