---

How did solar energy help get Europe through the heatwave? June 2025 saw the highest EU solar generation on record at 45 terrawatt hours (TWh), a 22 per cent increase ...

Solar power consists of photovoltaics (PV) and solar thermal energy in the European Union (EU). Solar power is growing in every EU country.

According to a new report from energy think tank Ember, the heatwave that swept across Europe in June and early July 2025 pushed electricity systems to their limits. ...

key solar process heat systems, with 34 in the EU. Mexican and Chinese companies report the most projects, but EU companies are well represented: G2 Energy (NL), Ritter XL Solar (DE), ...

This paper revealed the compound impacts of South European heatwaves on the power system (i.e., high power demand and low renewable power generation). The ...

BRUSSELS/LONDON, Aug 7 (Reuters) - A major increase in solar power generation in southern Europe played a leading role in averting energy shortages during the heatwaves of recent ...

Solar power generation under high temperatures presented a paradoxical scenario. On the one hand, EU solar power generation reached a record high of 45.4 TWh in June, a ...

The SUNSON project will promote net-zero emission electrification through a smart combination of advanced concentration solar power with ultra-high temperature storage system for ...

European Union (EU). In 2010, the EUR2.6 billion European solar heating sectors consisted of small and medium-sized businesses, generated 17.3 terawatt-hours (TWh) of energy, employed 33,500 workers, and created one new job for every 80 kW of adde...

A June-July heatwave has caused stress for European power systems, driving electricity demand and doubling daily power prices. Yet grids remained stable, fueled by ...

The SUNSON project will promote net-zero emission electrification through a smart combination of advanced concentration solar power with ultra-high ...

The July 2019 heatwave was a period of exceptionally hot weather in Europe, breaking all-time high temperature records in Belgium, Germany, ...
