This study investigates the integration of solar energy in a heating and cooling network to fulfill the energy requirements of a hospital ...

Egypt has secured \$479.1 million in financing to develop a 1.1 GW solar photovoltaic (PV) power plant integrated with a 200 MWh ...

This study investigates the integration of solar energy in a heating and cooling network to fulfill the energy requirements of a hospital in Cairo, Egypt, as a case study.

Scatec has reached financial close on its \$590 million "Obelisk" hybrid solar and battery project in Egypt.

"We are proud to break ground on Egypt's first hybrid solar and battery project, building on our proven track record with similar developments.

The development marks a major milestone for the country's clean energy transition, being the first utility-scale solar and Battery Energy Storage System (BESS) project ...

The study analyzes a hospital located in the Gulf Cooperation Council (GCC) region that utilizes a solar-collected water-heated system to investigate the potential impact of adding ...

Egypt's first large-scale hybrid solar and battery plant has begun construction as the country looks to its abundant sunshine to help fix its energy crisis.

Egypt has secured \$479.1 million in financing to develop a 1.1 GW solar photovoltaic (PV) power plant integrated with a 200 MWh Battery Energy Storage System ...

Scatec, a Norwegian leader in renewable energy solutions, has officially commenced construction on its ambitious 1.1 GW Obelisk solar project coupled with a 100 ...

Using a skylight system equipped with solar optical devices on the building's roof to control direct solar heat absorption and daylight illumination factor, and utilizing skylights while reducing the ...

Egypt's first large-scale hybrid solar and battery plant has begun construction as the country looks to its abundant sunshine to help ...
