-----

Ever wondered how a sun-soaked nation like Eritrea plans to keep the lights on when the grid gets shaky? Enter the Eritrea Daxi Energy Storage Power Station - a project ...

Recent example: 40,000 residents and businesses in the northeast African country of Eritrea now have reliable electricity thanks to two new ...

Discover how bidirectional charging is revolutionizing energy use and what role it plays in the future of electric mobility.

Located near the town of Dekemhare, approximately 40km southeast of the capital, Asmara, the ambitious project encompasses a ...

A new scheme backed by the African Development Bank's Desert to Power initiative will fund new solar PV capacity, battery energy ...

This study explores strategies for maximizing direct renewable energy consumption by incorporating residential photovoltaic (PV) and wind energy into Eritrea's electricity grid.

The 40ft energy storage container adopts an off-grid solar solution and is equipped with a 770kWh battery system, consisting of five ...

Located in Eritrea's sun-drenched coastal region, this innovative 250kW/2MWh photovoltaic-storage hybrid system delivers stable, sustainable power to a factory completely disconnected ...

Located near the town of Dekemhare, approximately 40km southeast of the capital, Asmara, the ambitious

project encompasses a 30MW solar photovoltaic power station ...

Building on this momentum, Eritrea is now launching three new solar mini-grid projects under the DtP framework, targeting the regions of Tesseney, Kerkebet, and Barentu.

Building on this momentum, Eritrea is now launching three new solar mini-grid projects under the DtP framework, targeting the ...

Recent example: 40,000 residents and businesses in the northeast African country of Eritrea now have reliable electricity thanks to two new minigrids. Developed by UK-based Solarcentury, ...
