What is MPPT solar inverter?

Nowadays, almost all solar inverters are embedded with MPPT technology. An MPPT solar inverter performs two roles: The maximum power point tracker in the inverter converts high DC power into low DC power. The low DC power is converted into AC power that's used to run your household appliances.

Which Inverter should I buy in Malaysia?

Go for inverters with high efficiency ratings (above 95%) and a proven track record. Brands that have been used widely in tropical climates tend to perform better in Malaysia. Can you get the units quickly when needed?

Who makes solar charge controllers & inverters?

Solar Charge Controllers With over 4 million products sold in over 100 countries since 1993 -- functioning in some of the most extreme environments & mission-critical applications in the world -- Morningstar Corporation is truly "the leading supplier of solar controllers and inverters."
