-----  
Why did the fire department use a shipping container complex?

The fire department wanted to use a shipping container complex, as these facilities allow firefighters to better train in real-life scenarios with the necessary safety guards in place.

What is a fire training container?

These fire training structures offer an investment in firefighter safety by providing fire scenarios and challenges while allowing firefighters to train in safe, near real-life conditions. These containers offer a versatile environment, from realistic fire training props to unique or specialized environments such as multi-floor fire training.

Why should you build a fire training building with shipping containers?

Building with shipping containers also means the design can easily grow over time. Solution: Our team put together a facility consisting of three shipping containers fused together. Internally the structure simulates an average home with walls, doors and windows. Check out our floor plan below for specifications on this fire training building.

Can storage containers be used for emergency response training?

United Rentals storage containers have various uses throughout different industries, but their use in emergency-response training is often overlooked. Our containers can easily be customized and redesigned to serve as fire training structures and first-responder training facilities for practice drills.
