Construction is expected to begin soon, with the station scheduled to be operational by early summer 2027. Once online, it will enable SamTrans to efficiently fuel its full fleet of ...

Participating partners from the U.S. hydrogen fueling station industry share raw data with NLR via the National Fuel Cell Technology Evaluation Center. NLR engineers ...

WHY: OCTA's hydrogen fueling station is the largest in the nation for public transportation. Along with the 10 fuel cell buses, this represents a \$22.9 million investment in zero-emission transit.

SamTrans is moving ahead with its plans to transition from diesel to a hydrogen fuel cell electric fleet, with 10 buses already in ...

Intercity Transit awards \$4.6 million contract for hydrogen fueling station at Pattison Street base to support deployment of 5 fuel cell electric buses.

ANAHEIM, Calif. (April 28, 2025) - Toyota Motor North America (Toyota) today reaffirmed its commitment to a Hydrogen Society at the 2025 Advanced Clean Transportation Expo, ...

B staff expect only two more stations to open this year as their construction is complete and will be ready for Hydrogen Station Equipment Performance (HyStEP) testing. According to station ...

The U.S. Department of Energy's Hydrogen and Fuel Cell Technologies Office (HFTO) leads research, development, and demonstration (RD& D) of hydrogen and fuel cell technologies ...

- Today, HydroFleet announced it is investing nearly \$33 million in Pooler to construct a hydrogen production and fueling station ...

Construction is expected to begin soon, with the station scheduled to be operational by early summer 2027. Once online, it will ...

- Today, HydroFleet announced it is investing nearly \$33 million in Pooler to construct a hydrogen production and fueling station that will service environmentally friendly ...

The analysis results clearly indicate a very positive development trend for fuel cell vehicles and hydrogen refueling stations in 2021, with the highest number of new vehicles and stations in a ...
