Peak Energy announced the launch and shipment of its sodium-ion battery energy storage system (ESS). The solution delivers a patent-pending passive cooling design to ...

Peak Energy debuts the US's first grid-scale sodium-ion battery, cutting costs and boosting reliability with passive cooling tech.

Peak Energy is on track to fulfill its commitment to develop grid scale battery supply chains, with its first U.S. cell factory under development and planned to start production in 2026.

Two battery companies are joining forces with a plan to deploy energy storage systems in the US that rely on sodium-ion technology.

Sodium-ion battery energy storage system (BESS) startup Peak Energy has launched and shipped its first sodium-ion BESS to be deployed in a shared pilot with nine ...

The energy storage landscape is poised for a significant shift as leading battery maker EVE Energy makes a decisive move. The company has officially broken ground on its ...

Two battery companies are joining forces with a plan to deploy energy storage systems in the US that rely on sodium-ion ...

Peak Energy, a US-based company developing low-cost, giga-scale energy storage technology for the grid, has announced the launch and shipment of its sodium-ion battery ...

After China, the US now gets its first grid-level energy storage system with sodium-ion batteries that require

no active cooling and cost a ...

After China, the US now gets its first grid-level energy storage system with sodium-ion batteries that require no active cooling and cost a third less than a traditional BESS with ...

Sodium-ion battery energy storage system (BESS) startup Peak Energy has launched and shipped its first sodium-ion BESS to be ...

Peak Energy announced the launch and shipment of its sodium-ion battery energy storage system (ESS). The solution delivers a ...
