This marks Ormat's and the partnership's first major entry into the Israeli utility scale energy storage market. The partnership intends to develop this activity and develop ...

To this end, the Israeli network operator Nega Company ran a tender in July 2024 which attracted offers from 11 bidders for the construction and operation of 29 high-voltage ...

The Israeli Ministry of Energy and Infrastructure has announced that the country's National Council had approved a detailed master plan for the construction of Israel's first large-scale ...

From stabilizing electric grids in Europe to providing reliable renewable energy in remote locations across Africa and Asia, Israeli storage solutions are proving their value in ...

To help Israel's industrial and commercial energy transition, GSL Energy and Deye have jointly created a highly efficient and flexible energy storage demonstration project.

Here's the kicker: photovoltaic (PV) plants without storage can't solve the 'sunset problem' - when energy production plummets exactly when demand peaks. That's where Israel's new ...

El-Mor will design and build battery energy storage systems (BESS) and related infrastructures for multiple projects with a total capacity of 1.5GWh and total power of 300MW.

Through this strategic partnership with EL-Mor, we are delivering the long-duration energy storage technology that will help stabilize Israel's grid, enhance solar integration, and empower a ...
