How many hydrogen fueling stations are there?

Additionally, there are over 20 stations in various stages of planning or construction. Most of the existing and planned stations are in California and one in Hawaii. As the market expands, hydrogen fueling stations will be matched with vehicle rollout as both grow together.

How do I find a number of hydrogen stations?

Roll over a state on the map for count of hydrogen stations. To map hydrogen stations near a specific address or city, use the Alternative Fueling Station Locator. For station counts and historical information, see Station Counts by State. Find maps and charts showing transportation data and trends related to alternative fuels and vehicles.

Are hydrogen fueling stations the same as gasoline stations?

Customers are expected to have similar experiences at hydrogen fueling stations as at gasoline stations, with most hydrogen dispensers being added at existing gasoline stations. The Alternative Fueling Station Locator allows users to search for public and private hydrogen fueling stations.

Does h2stations provide information on the availability of a hydrogen station?

H2stations.org does not provide information on the current availability of a hydrogen station, but does provide a global overview of the existing, planned and completed infrastructure. If you wish to submit station data and/or images, please supply such according to this template and send it to webmaster@h2stations.org.
