How do you dispose of a Huawei energy storage system?

Move the removed batteries to a safe place (an open and safe outdoor place is recommended), and then place the batteries in the fire sand box or salt water. If a Huawei energy storage system (ESS) emits smoke or catches fire, household members should not dispose of the ESS by themselves. Follow the following steps:

What if a Huawei energy storage system emits smoke or catches fire?

If a Huawei energy storage system (ESS) emits smoke or catches fire, household members should not dispose of the ESS by themselves. Follow the following steps: If batteries emit smoke or catch fires, notify all household members to evacuate immediately.

How do I contact Huawei residential inverters & ESS?

If you have any questions about Huawei residential inverters and ESSs, contact your installer or call our local service hotline. For local customer service contact information, visit Huawei official website or choose Me > About > Contact Us on the app.

What should I do if my Huawei is leaking electrolyte?

After evacuating to a safe outdoor area (20 m away is recommended), call the fire department immediately. While waiting for the fire rescue, contact the installer and Huawei technical support. The leaked electrolyte is a colorless viscous liquid that may evaporate rapidly and is flammable, turning into white salt residues.

Huawei's energy storage emergency power supply is not only oriented toward meeting immediate energy needs but also aligns with contemporary environmental ...

Whether you're an energy enthusiast or an integral player in the transition toward renewable energy, this article is designed to provide you with a comprehensive understanding ...

Huawei, in collaboration with TÜV Rheinland, has released a white paper that proposes a comprehensive safety design concept, from equipment to personal safety, protecting our green ...
