-----

On November 30, 2025, a semi-solid-state battery energy storage power station with a capacity of 200 MW/800 MWh was successfully connected to the grid in Wuhai, Inner ...

On June 30, 2025, the independent energy storage project of Zhoushan Lisiner was successfully connected to the grid and put into operation. The project has a scale of ...

On June 30, 2025, the independent energy storage project of Zhoushan Lisiner was successfully connected to the grid and put into ...

Recently, the 100MW/50.43MWh independent hybrid frequency regulation energy storage power station project in Yicheng, Shanxi, which was jointly constructed by SMS ...

On September 8, the world's first 400MWh energy storage station built with 628Ah large-scale batteries was successfully connected to the grid in one attempt. As a leader in large battery ...

This marks the completion and operation of the largest grid-forming energy storage station in China. The photo shows the energy storage station supporting the Ningdong ...

As the share of renewable energy in the power system continues to rise, the demand for regulating resources becomes increasingly pressing. The independent grid ...

As the largest independent energy storage facility in southern Xinjiang, this project is expected to provide significant momentum for regional energy transition and economic ...
