Tata Power's 100 MW/120 MWh solar-plus-storage plant in Chhattisgarh, and JSW Energy's 125 MW/500 MWh standalone BESS in Kerala, are among India's largest grid-scale ...

Energy storage is critical towards ensuring grid reliability, security, and cost optimisation given India's growing share of renewable energy in its power purchase mix.

Dramatic cost reductions over the last decade for wind, solar, and battery storage technologies position India to leapfrog to a more flexible, robust, and sustainable power system for ...

Bihar Kajra Solar Project: The Bihar government has officially commissioned the first phase of the Kajra Solar Project, an ambitious INR2,800 crore initiative aimed at boosting ...

BESS, a key enabler for energy transitions, is crucial for India and other countries to realize their transition goals. Located at a high demand sub-station, the project will improve ...

India has launched its first variable speed pumped storage plant at Tehri, Uttarakhand. Learn how this 1,000 MW hydro project boosts grid stability and renewable ...

Given the importance of ESS and PSPs for India's energy transition, our recent paper titled "Pumped Storage Plants in India: Assessing Policies and Progress" presents the ...

India's first grid-scale battery storage in Chhattisgarh enables cleaner energy, cuts emissions, and sparks massive investment in renewable power solutions.

Three players--Greenko, Adani Green, and JSW Energy--are set to develop nearly two-thirds of India's
