Indonesia takes a significant step in its energy transition with the launch of its first solar power plant integrated with an energy storage system. Located in Nusantara, the project combines a ...

Studies for the project were carried out in the 1990s and a detailed design was completed in 2002. A World Bank loan for the project was approved in May 2011 and signed in November. The West Java government approved the project in October 2011. Preliminary construction such as access road building began in early 2014. The first generator was then expected to be operational by 2019.
