Which international trade issues will remain a concern for energy storage projects?

Two major areas of international trade that will remain causes of concern for energy storage projects are the application of tariffs and supply chain integrity.

Why did the EU stop dumping imports from Germany & the Netherlands?

Products from Germany and the Netherlands, among other countries (the investigation against the Netherlands was terminated in January 2024). The EU highlighted the lack of evidence of dumping and argued that the case was tantamount to a safeguard investigation covering almost all imports into the US.

Why did the US launch a tin mill Anti-Dumping case in 2023?

Due to lack of injury. In February 2023, the US initiated an anti-dumping investigation on tin mill products from Germany and the Netherlands. The economic interest in the case was very significant at EUR1 billion, higher than in any other US trade defence case against the EU or its Member States. The Commission was very active in

How does the EU calculate dumped imports?

Since December 2017, the EU has an alternative method to calculate dumped imports if state interference significantly distorts the economy of the exporting country. In this case, the Commission will use undistorted benchmarks to determine the 'normal value' of the product.

An anti-dumping complaint is filed with the European Commission by or on behalf of the EU producers of the product concerned either directly or via the authorities of an EU country.
