Are battery energy storage systems safe?

WASHINGTON, D.C., March 28, 2025 -- Today, the American Clean Power Association (ACP) released a comprehensive framework to ensure the safety of battery energy storage systems (BESS) in every community across the United States, informed by a new assessment of previous fire incidents at BESS facilities.

Are battery energy storage facilities safe in New York?

Yes. New York is home to 6,000+ battery energy storage facilities. Fires at these facilities are rare, and developers and regulators in New York have already begun taking steps to mitigate risks by implementing enhanced safety protocols and emergency response plans - and reviewing and updating existing fire codes.

Will battery storage improve air quality in New York?

New York has among the most stringent fire safety codes in relation to battery storage in the nation with updated codes adopted in 2025. After the codes were adopted, a group of former FDNY leadership released the following statement. Battery energy storage systems will improve air quality and help support the state's clean energy transition.

Why do we need battery energy storage?

Battery energy storage offers a clean, reliable solution to meeting peak demand by replacing fossil fuel-emitting peaker plants. Renewable energy also benefits our water resources. Battery energy storage systems also have a small footprint and are typically developed alongside existing solar, wind, and other industrial sites.

"The energy storage industry is committed to a proactive and tireless approach to safety and reliability. At its core, energy storage facilities are critical infrastructure designed to ...

Battery energy storage will ensure that New York's electric grid is reliable and resilient, even in the face of extreme weather events. Battery energy storage systems store energy from renewable ...

Contact site operator for assistance in accordance with the Emergency Response Plan (ERP). Confirm power
