Energy storage systems are an essential element of Latvia's path towards a sustainable and energy-independent future. The ...

Niam Infrastructure and Evecon have formed a partnership for the construction of up to 84 MWp of solar power and 26 MW of energy storage across 11 project sites in Latvia.

Energy storage systems are an essential element of Latvia's path towards a sustainable and energy-independent future. The importance of these technologies is being ...

Based on simulations performed for various levels of vRES installed capacities, we evaluated the hosting capacity of the Latvian grid for each of the innovative measures in study.

At SolarInstallations, we specialize in delivering high-quality, reliable solar installations tailored to meet your home or business energy needs.

The developed guidelines promote a common understanding of the requirements of regulatory acts in the use of renewable energy resources and energy construction in the ...

We provide high-quality photovoltaic panels, inverters, and mounting systems, ensuring efficient and sustainable energy solutions for commercial and residential projects.

A 84 MW of solar and 26 MW of energy storage portfolio will be installed in Latvia under the Niam-Evecon partnership. Discover the full project details here.

d in Salaspils in 2019 (see Fig. 2). The project backed by EU, developed by LTD Filter, the Baltic energy
