How much does a 40ft high cube container cost in Manila?

The 40ft high cube container (HC) has extra height and is perfect for taller and high-volume cargo. For a new 40ft HC shipping van, you're looking at a price anywhere between \$3500 to \$4500 in Manila. If you're looking for a more affordable option, then used 40ft HC units are perfect for you.

How much does a new container cost?

A new container is a good choice if you want to use it for a long time since it usually lasts for around fifteen to twenty years. However, a new 20-foot container may cost anywhere from \$2,000 to \$3,000, so be ready to spend extra. In terms of cost, cargo-worthy containers are a fantastic option.

How much does a refrigerated container cost?

Market demand. Agricultural peak seasons and periods of high export of perishable goods may cause prices to rise as a result of demand. New refrigerated containers cost between \$8,000 and \$10,000 for a 20-foot container and \$12,000 to \$15,000 for a 40-foot one. Used containers are far more affordable.

Why are Seavan containers so expensive?

Seavan container pricing is also very sensitive to macroeconomic factors. There is usually an excess of containers during economic downturns, which causes costs to drop. But when economies are doing well, trade activity rises, and prices follow suit as a result of increasing demand.
