-----

MANILA, Philippines -- The Philippines must race to build at least 2,000 megawatts (MW) of standalone battery energy storage systems (BESS) to avoid grid congestion as more ...

As battery costs continue decreasing (18% price drop projected by 2025), solar-storage systems will become standard for both commercial and residential users across Metro Manila.

Energy Virtual One-Stop Shop System (EVOSS): Under Republic Act No. 11234, prospective energy companies can apply, monitor, and receive all the necessary permits, ...

The Department of Energy expects around 6,841 megawatts of new power supply and 330 MW of battery energy storage system to come online across the three grids this year.

Philippines president Ferdinand Marcos Jr visited the world's largest combined solar PV and battery storage plant as construction began.

The project, which is strategically located on the Philippines' main island of Luzon, about 100km from Manila, will combine 3.5GWp of ...

The Philippine Solar and Storage Energy Alliance (PSSEA) said the solar energy industry is forecasted to expand further this year amid rapid pace of installation, helping the ...

The project, which is strategically located on the Philippines' main island of Luzon, about 100km from Manila, will combine 3.5GWp of solar PV capacity with 4.5GWh of battery ...
