In response to more frequent blackouts, Mexico recently developed hybrid plants that have both a solar power generating capacity and battery storage capabilities.

Thanks to the country's geographical conditions, Mexico has great potential for solar and wind energy, which makes it an ideal candidate for the implementation of energy ...

Recently, the Mexican Ministry of Energy announced a new regulation mandating that all newly built wind and solar PV projects must be equipped with energy storage systems ...

The Storage Regulations contain rules on the applicability of interconnection and connection studies; the possible offers for the purchase and sale of electricity, capacity, and ...

The new regulations aim to optimize the integration of energy storage systems, ultimately increasing investments in modern solutions such as smart grids and power system ...

These classifications provide a structured approach for integrating storage technologies into Mexico's electricity sector, improving grid reliability and efficiency.

The DACG aim to establish the modalities and general conditions under which the integration of Electric Energy Storage Systems (SAE) into the National Electric System (SEN) ...

Future wind and solar energy projects in Mexico will be required to colocate battery energy storage systems equivalent to 30% of their capacity, a senior government ...

Mexico's National Commission for Regulatory Improvement (CONAMER) has published a draft agreement
