HOUSTON/WASHINGTON, D.C., March 19, 2025 -- The U.S. energy storage market set a new record in 2024 with 12.3 gigawatts (GW) of installations across all segments, ...

In 2025, capacity growth from battery storage could set a record as we expect 18.2 GW of utility-scale battery storage to be added to the grid. U.S. battery storage already achieved record ...

US energy storage set a Q1 record in 2025 with 2 GW added, but looming policy changes could put that growth at serious risk.

View data on all the projects approved by NYSERDA's Retail and Bulk Energy Storage incentive programs. Data includes completed projects as well as projects that have been approved for ...

We need to think more deeply about thermal energy storage as a pathway to industrial decarbonisation and managing electricity costs, writes Pasquale Romano, CEO of Redoxblox.

Fortunately grid-scale storage and next-generation energy operating systems are rising to the challenge. In a letter to state regulators, 18 legislators say that PG& E and SCE ...

The following resources provide information on a broad range of storage technologies.

Search the NLR publications database to access our full library of energy storage publications.

The global energy storage market is poised to hit new heights yet again in 2025. Despite policy changes and uncertainty in the world's two largest markets, the US and China, ...

The U.S. energy storage market set a new record in 2024 with 12.3 gigawatts (GW) of installations across all

segments, according to the latest U.S. Energy Storage Monitor ...
