-----  
Will energy storage growth continue through 2025?

With developers continuing to add new capacity, including 9.2 GW of new lithium-ion battery storage capacity in 2024 through November 2024 and comparable levels of growth expected through the fourth quarter of 2024, energy storage investments and M&A activity are expected to continue this trajectory through 2025.

How does market design affect energy storage technology development in Europe?

Inadequate market design in Europe is more in favor of traditional technologies and pushes the market towards more use of old technologies rather than preparing for the presence of emerging technologies, and this can affect and reduce the speed of development and spread of new energy storage technologies (Ruz and Pollitt, 2016).

Why do RE sites use energy storage systems?

RE sites increasingly utilize energy storage systems to enhance system flexibility, grid stability, and power supply reliability. Whether the primary energy source is solar, wind, geothermal, hydroelectric, or oceanic, EES provides the critical ability to store and manage energy efficiently.

1. Introduction  
Why is energy storage a problem?

The lack of direct support for energy storage from governments, the non-announcement of confirmed needs for storage through official government sources, and the existence of incomplete and unclear processes in licensing also hurt attracting investors in the field of storage (Ugarte et al.).

Optimized smart grids and microgrids benefit from EES, making energy systems more efficient and reliable. The rise of electric vehicles as an eco-friendly transportation ...

In this report, our lawyers outline key developments and emerging trends that will shape the energy storage market in 2025 and beyond.

Massachusetts's Department of Energy Resources (DOER) has completed the evaluation of bids received in response to the Section 83E Storage ...

While some regions of the United States have made progress integrating energy storage into energy resource portfolios, several organized electricity markets have yet to ...

Massachusetts's Department of Energy Resources (DOER) has completed the evaluation of bids received in response to the Section 83E Storage request for proposals (RFP), selecting ...

This RFI solicits feedback on a proposed Blue Sky Training Program to train first responders, law enforcement agencies, local communities, and utilities on responding to unanticipated failures ...

As the US faces surging power demand and aims to strengthen its grid to meet the needs of artificial intelligence data centres, ...

As the US faces surging power demand and aims to strengthen its grid to meet the needs of artificial intelligence data centres, battery energy storage -- one of the leading ...

This RFI solicits feedback on a proposed Blue Sky Training Program to train first responders, law enforcement agencies, local communities, and ...

With these reforms, energy storage can scale to meet the moment: strengthening the grid, lowering costs and securing America's energy future. These steps are not optional--they ...

In July 2024, Hochul announced that New York State will receive U.S. Department of Energy funding for a long-duration energy storage demonstration project that will use fire ...

To enhance the willingness of new energy project owners to voluntarily integrate energy storage, over 20 provinces nationwide have implemented time-of-use pricing and spot ...
