How many 5G base stations are there in China?

In data collected between July 2022 and June 2024, China was reported to have had around 3.5 million 5G base stations installed across the country, with Chinese mobile operators investing heavily in 5G infrastructure. By comparison, the European Union had around 460,000 thousand base stations, while the United States had approximately 175,000.

What is the mobile telephony market like in Chile?

The Chilean market for fixed and mobile telephony is highly competitive and rapidly evolving. The mobile penetration rate is among the highest in South America. Movistar and Entel remain the market leaders, followed by Claro and WOM.

Who is the market leader in 5G?

Movistar and Entel remain the market leaders, followed by Claro and WOM. LTE infrastructure is extensive and 5G spectrum auctions which took place in February 2021 are expected to prompt the deployment of 5G networks by the end of the year, following extensive trials held by the MNOs.

Who are the leading fixed broadband operators in Chile?

The leading fixed broadband operators are Telefónica Chile, trading as Movistar, VTR Globalcom (VTR), the GTD Group, Entel, Claro, and WOM. Traditional fixed-line teledensity continues to fall as consumers switch to mobile networks and to fixed broadband for voice and data connectivity.

Movistar and Entel remain the market leaders, followed by Claro and WOM. LTE infrastructure is extensive and 5G spectrum auctions which took place in February 2021 are expected to ...

Each operator was awarded 50 MHz of spectrum, totaling the full 150 MHz available. In addition, they were assigned substantial coverage obligations: WOM committed ...

According to the Chilean government's plans, the deployment of 5G will require 9,000 new base stations, of which 67% will be located in provinces and the remaining 33% in ...
