The project will target 14 out of the 47 counties in Kenya that have been defined as marginalized by the Commission on Revenue Allocation (CRA). The 14 underserved counties collectively ...

Extensive research conducted on mini-grid systems deployed across Kenya has documented meaningful socioeconomic transformations in communities gaining access to reliable electricity.

This figure includes both grid-connected Solar Power plants and off-grid installations. The country has increasingly turned to Solar ...

The Kenya Off-Grid Solar Access Project (KOSAP) is a project of the Ministry of Energy and Petroleum (MoEP) and is financed by the World Bank (WB). It aims at providing electricity and ...

Both our container system and container expansions are often utilised in camping and glamping sites, construction sites, remote industrial units and anywhere that requires self-sufficient ...

Power your operations anywhere in Kenya and beyond with our robust, reliable commercial solutions. Hybrid and off-grid solar power stations, designed to meet the unique demands of ...

There are several productive use applications for off-grid energy, especially in the agriculture sector such as solar water pumps, which also have numerous socioeconomic impacts.

This case shows how a purpose-built solar container solution helped an EPC deliver reliable, clean, and cost-effective power for a remote camp in Kenya. The system matched the EPC's ...
