Provide stability to your base station antenna with mounts from Walcott Radio. They are designed to endure mechanical tilting, vibrations and harsh weather.

Roof Mounting: One option is to install your weather station on a tripod, either on the roof or on the ground. Note that Acurite weather stations use a 1? mast, while Ambient and ...

Anything on your roof will require a ladder, so if you do not have one or if climbing on your roof makes you uncomfortable, just choose one of the ground mounting solutions.

Roof-mounted STNDs (Standard Mounts) are structural supports used to securely attach telecommunications equipment, such as antennas, satellite dishes, and relay stations, to ...

While you can connect a handheld radio to your new antenna, a 50-watt base station delivers far better performance. We used a Yaesu FTM-100D, but any reliable dual-band transceiver will ...

While you can connect a handheld radio to your new antenna, a 50-watt base station delivers far better performance. We used a Yaesu FTM-100D, but ...

We've compiled this guide to help you find a mounting solution and site your weather station correctly. Where possible, we've used guidelines from official observer ...
