What is Poland doing about energy storage?

Poland has just rolled out one of Europe's most ambitious energy storage programmes- a EUR980 million initiative that's set to transform the country's grid infrastructure. The Polish Ministry of Climate and Environment has finalised this landmark subsidy scheme, targeting over 5 GWh of new storage capacity by 2028.

What is Poland's energy storage subsidy?

Learn about Poland's EUR1 billion energy storage subsidy aimed at installing 5.4 GWh of BESS by 2028, strengthening grid stability and accelerating the green transition.

What is Poland's new energy storage scheme?

The scheme has been brewing since 2024, with the final regulation published in the Journal of Laws of the Republic of Poland in March this year. It received European Commission approval, which authorised state aid of EUR1.2 billion in state aid to support at least 5.4 GWh of new electricity storage facilities.

How much money does Poland spend on battery energy storage?

Poland has finalized a comprehensive subsidy program aimed at accelerating the deployment of battery energy storage systems (BESS), with a total budget of PLN 4 billion (approximately EUR1 billion).

Poland is a semi-presidential republic with its bicameral legislature comprising the Sejm and the Senate. Considered a middle power, it is a developed market and high-income economy that ...

Poland, formally the Republic of Poland (Polska, Rzeczpospolita Polska), is a country in Central Europe, stretching from the Carpathian and Sudeten Mountains to the Baltic Sea.
