How do you charge a power bank?

Initial Charging Test: Plug in a USB wall charger to your power bank's input port (Micro USB or USB-C). The board's indicator LED should light up to show that charging has begun. Let it charge for a while to build up energy in the battery pack.

How do I use a power bank?

Using a power bank is generally straightforward, but there are some best practices to follow for optimal performance and longevity: Charge the Power Bank: Before first use, charge your power bank fully. Most power banks come with a USB cable for charging.

Can you build a DIY power bank with USB ports?

When building a DIY power bank with USB ports, you can go about powering the USB charge portion of the circuit one of two ways. You can either raise the voltage of a single lithium-ion cell or cell group up to 5 volts, or you can lower a higher battery pack voltage down to 5 volts.
