Are solar modules coming to Brazil?

However, some of these PV modules have not yet arrived in Brazil, which will be reflected in the import data for the first quarter of 2024. In 2023, the price of solar modules in Brazil fell by an average of 40%, mainly due to the expansion of the Brazilian solar industry.

Is rooftop PV a viable option in Brazil?

Rooftop PV accounts for around 70% of the installed PV capacity in Brazil, and as the information about the widening price difference between solar electricity and retail electricity tariffs spreads, more and more residential consumers embark on the rooftop PV option.

Why is PV the second largest contributor to Brazil's electricity mix?

Favorable net metering legislation, rising conventional electricity tariffs, and consistent and strong downward trends in photovoltaic equipment prices in recent years have led PV to become the second largest contributor to Brazil's electricity generation mix.
