From ESS News Solar and energy storage deployment is booming in Chile, spurred on by supportive government policy that has been markedly stable for 15 years.

Having launched a national storage strategy in 2023 that sets targets and aims to attract investment in the sector, and with a large ...

Having launched a national storage strategy in 2023 that sets targets and aims to attract investment in the sector, and with a large pipeline of projects on the way, Chile's ...

Chile is making significant strides in expanding its power generation capacity, with a strong emphasis on renewable energy ...

Battery storage and flexible gas generation are expected to play a crucial role in facilitating the transition. The importance of having enough energy storage capacity is clear from the rising ...

Chile is rapidly moving to build more power generation capacity, with much of that effort focused on renewable energy resources and ...

Chile is rapidly moving to build more power generation capacity, with much of that effort focused on renewable energy resources and battery energy storage systems (BESS).

Chile is making significant strides in expanding its power generation capacity, with a strong emphasis on renewable energy resources and battery energy storage systems (BESS).

Chile will need new renewable energy storage systems to replace its current backup capacity of coal-fired
