Did a faulty power bank cause the Air Busan plane fire?

A fire that destroyed an Air Busan plane in January has prompted a closer examination of lithium-ion battery safety. A faulty power bank was the likely cause of the blaze that engulfed the plane at South Korea's Gimhae International Airport, according to interim investigation results released on Friday by the country's transport ministry.

Can I carry a power bank on Air Asia?

Air Asia: Guests may only carry power banks that do not exceed 100 watt-hours (Wh) or 20,000 milliampere-hours (mAh). Power banks between 100Wh and 160Wh require airline approval at the check-in counter.

Will air Asia ban portable chargers in flight?

Low-cost carrier Air Asia said it will require passengers to store power banks under the seat or in the seat pocket, and prohibit charging portable electronic devices throughout the flight. Taiwan's major carriers, EVA Air, China Airlines, and Uni Air, have also banned the use of portable chargers in-flight.

Can You charge a power pack on a plane?

Also prohibited is charging power packs using the in-flight power supply or from one pack to another. The capacity of a power bank on a flight cannot exceed 160 watt-hours (Wh) for either carry on or check in. Five power banks of up to 100 Wh or two between 100 and 160 Wh will be allowed.
