Utility Osaka Gas and developer Sonnedix are installing what is claimed to be the largest battery storage facility co-located with renewable energy generation in Japan so far.

Case Study 1: Osaka's Floating Solar + Storage Combo Kansai Electric Power Company combines floating solar photovoltaic panels on a small warehouse pond with an ...

Utility Osaka Gas and developer Sonnedix are installing a battery energy storage system (BESS) at the latter's 38.7MW Oita solar ...

Interest among households has been strong, with more than 3mn residential solar systems installed last year. Demand for a similar number of residential batteries should follow ...

Here, we will delve into our path taken to launch a completely new business and start operation of the first large-scale energy storage facility in Japan in 2024, as well as the challenges and ...

Japan's largest renewable battery storage project will be co-located with Sonnedix's 30 MW AC/38.6 MW DC solar power facility. It is expected to enhance grid stability ...

Technological advancements are dramatically improving solar storage container performance while reducing costs. Next-generation thermal management systems maintain optimal ...

Interest among households has been strong, with more than 3mn residential solar systems installed last year. Demand for a similar ...

Here, we will delve into our path taken to launch a completely new business and start operation of the first
