-----

We tested leading UPS models and found that the CyberPower LE1000DG is the best option to keep essential gear running for up to three hours in a power outage.

We've compared these UPS devices across many factors, like their size, power supply, runtime, and battery recharging time. We looked ...

Discussion: Provision of an alternate power supply with minimal operating capability can be satisfied by accessing a secondary commercial power supply or other external power supply.

We've compared these UPS devices across many factors, like their size, power supply, runtime, and battery recharging time. We looked at what types of environments they'd ...

An uninterruptible power supply (UPS) helps prevent sudden shutdowns, data loss, and hardware damage by providing backup power when your main electricity fails.
