Key Figures & Findings: Seychelles has begun construction of its first utility-scale floating solar power plant, a 5.8 MW project in the Providence Lagoon on Mahe Island.

By mid-2025, Seychelles is poised to take a significant leap in renewable energy with the launch of its first floating solar farm--the ...

By mid-2025, Seychelles is poised to take a significant leap in renewable energy with the launch of its first floating solar farm--the largest in Africa.

The much-anticipated 5MW Floating Independent Power Producer (IPP) Photovoltaic (PV) project in the Providence Lagoon is ... [Read more](#)

By deploying floating solar technology, the project makes use of lagoon surface area rather than scarce land, helping to overcome space constraints while unlocking new ...

As the first IPP utility-scale project in Seychelles and one of the largest floating solar PV projects in Africa, it represents a significant ...

Increasing Mahe's generator capacity is one of the main goals of this expansion project, which aims to meet the growing demand for power. PUC hopes to lessen its ...

Seychelles currently has a total power generation capacity of 129MW, mostly produced by PUC, through its diesel power plants and solar farms.

Renewable energy in Seychelles is a recent development in providing power to the country. Electricity for the island nation of Seychelles is primarily produced by diesel generators which ...

Seychelles has launched construction of its first utility-scale floating solar power plant, a 5.8MW project in the Providence Lagoon on ...

Renewable energy in Seychelles is a recent development in providing power to the country. Electricity for the island nation of Seychelles is primarily ...

To this end, the island nation is relying on green energy: a 50,000 square metre solar park with a total output of 6 megawatts was built on l'Île De Romainville in front of the ...
