T-Rex fire protection system for ESS (Energy Storage Systems). Designed for large solar or wind turbine fields where ESS are used.

It provides ancillary services to the market by regulating and reserving energy, contributing to grid stability and reliability. It can swiftly respond to ...

From protecting Singapore for over two decades to delivering 400+ projects across mission-critical industries, Active Fire is trusted for reliability and ...

This set of fire safety requirements applies to ESS which supply electrical energy at a future time to the local power loads, to the utility grid, or for grid support.

Owners, facility managers and policymakers are asking for fire safety solutions that not only protect people and assets, but also minimize carbon, water use and environmental ...

Concord New Energy Group (CNE) is a leading renewable energy company based in Singapore, specializing in wind and solar energy development, as well as energy storage solutions.

Our services include design, manufacturing, supply, installation, and maintenance for any industry. From design and engineering to installation ...

The solution is developed meeting the highest fire standards required in Singapore, supported by 24/7 monitoring facilities and control using a ...
