Which network offers 5G in Singapore?

According to OpenSignal, M1 was the most reliable network for actually connecting to 5G 52.9% of the time, followed by StarHub (48.1% of the time) and Singtel (41.5% of the time), and SIMBA once again in last place by quite a margin (23% of the time). Which providers offer 5G in Singapore?

What is 5G standalone & how does it work in Singapore?

Singapore is an early adopter of 5G Standalone (5GSA) infrastructure. Unlike the previous "non-standalone" version (still using 4G), 5GSA runs on an entirely new, standalone core network that is stronger and more stable. That means you're less likely to experience slowdowns, especially in busy areas.

What are the leading mobile networks in Singapore?

The leading Singapore mobile networks are SIMBA (formerly TPG Telecom), M1 (MobileOne), StarHub, and Singtel. You will learn about their rates, coverage, and cell speeds. And we'll help you pick the best one for your trip. For many years, 4G has been the standard. However, the major carriers have made a significant leap forward.
