This ambitious project underscores China 's blistering pace of solar panel installation, significantly outstripping global efforts, with these ...

China is setting unprecedented records in solar and wind energy installations, achieving monumental growth in May 2025.

This ambitious project underscores China 's blistering pace of solar panel installation, significantly outstripping global efforts, with these investments now beginning to ...

China's first gigawatt-level offshore photovoltaic (PV) project, currently the largest open-sea solar installation in the world, has been fully connected to the grid, marking a major ...

Some of the largest projects under development are in the Inner Mongolia region in northern China. The Kubuqi Desert in Inner Mongolia is the planned site of the largest ...

China is rapidly scaling up its solar and wind energy infrastructure, accounting for nearly three-quarters of all utility-scale ...

China is leading the world in new solar and wind installations, and saw a decline in carbon emissions for the first time in May.

China has switched on a record-breaking vanadium flow battery in Xinjiang, pairing it directly with a 1 gigawatt solar farm to soak up desert sunshine and feed it back into the grid after dark ...

In Q1 2025, China's wind and solar capacity surpassed its thermal (coal and gas) capacity for the first time,

supplying nearly 23% of the country's total electricity consumed, up from roughly ...

China is rapidly scaling up its solar and wind energy infrastructure, accounting for nearly three-quarters of all utility-scale projects currently under construction worldwide, ...

China has connected the world's first 1-GW offshore solar farm to the grid, a plant off Shandong set to generate 1.78 TWh per year.

The world's largest 1 GW offshore solar farm located off the coast of Dongying, Shandong Province, China is now connected to the grid.
