---

China-based JinkoSolar commissioned a 9.728 MW rooftop PV system at Bangkok's Krung Thep Aphiwat Central Terminal. The installation served Thailand's largest ...

Nevertheless, significant projects are in the pipeline: a 64 MW solar plant is currently under construction and a huge 240 MW floating ...

On April 10th, CHINA GEZHOUBA GROUP INTERNATIONAL ENGINEERING CO.,LTD ("CGGC INTERNATIONAL") and CPL signed ...

CKPower holds shares in Bangkhenchai Company Limited ("BKC") representing 100 percent of its registered and paid-up capital. Furthermore, BKC has invested in the Monocrystalline solar ...

Launched in 2021 and co-developed by China Energy Engineering Group, the project features a massive array of solar panels, totaling 144,000 and covering an area equivalent to ...

Up in northern Thailand's Khon Kaen, work is just beginning ...

Up in northern Thailand's Khon Kaen, work is just beginning on a two-kilometre solar power station from China Gezhouba Group International Engineering, a subsidiary of ...

Solar and wind installations were spurred in part by steep cost declines as fierce competition among manufacturers has pushed prices of ...

Nevertheless, significant projects are in the pipeline: a 64 MW solar plant is currently under construction and a huge 240 MW floating solar farm, by French energy giant ...

OverviewHistorySolar resourcesSolar photovoltaicsConcentrated solar powerSolar water heatingEffects on the global solar power industryGovernment incentivesChina is the largest market in the world for both photovoltaics (PV) and solar thermal energy. Its PV capacity crossed 1,000 gigawatt (one terawatt, 1 TW) in May 2025. By June 2025, China's PV capacity surpassed 1,100 gigawatt. In 2024, China added 277 gigawatts (GW) of solar power, which was equivalent to 15% of the world's total cumulative installed solar capacity.

Solar and wind installations were spurred in part by steep cost declines as fierce competition among manufacturers has pushed prices of panels and turbines in China to record ...

China currently owns the second-largest solar plant in the world, the Huanghe Hydropower Hainan Solar Park, which has a capacity of 2.2 GW. [8] In 2023, China completed the world's ...
