This ambitious project, launched in collaboration with the Indian Government, the Ministry of Power and Energy, and the Sri Lanka Sustainable Energy Authority (SLSEA), is a pioneering ...

The planned pumped storage is expected to store around 600 MW of energy. Located in Aranayake and Nawalapitiya, the project will store excess Renewable Energy (RE) ...

"By expanding and modernising infrastructure and incorporating digitalisation solutions, this project will support the government's goal of increased integration of renewable ...

This research contributes to the ongoing discourse on sustainable energy solutions, offering valuable insights for policymakers, energy experts, and stakeholders in Sri ...

The Maha Oya facility is designed to store excess renewable energy from solar and wind sources, thus creating supporting infrastructure for Sri Lanka's target of generating 70% of its electricity ...

Issuing a statement, the CEB said this groundbreaking 600 MW project will store excess renewable energy from solar and wind ...

The Maha Oya Pumped Storage Power Station is a 600MW pumped-storage power station being developed in the Aranayaka and Nawalapitiya areas of Sri Lanka. Upon completion, it will be the country's first energy storage facility, and one of the largest power stations in Sri Lanka in terms of nameplate capacity. The Maha Oya facility is designed to store excess renewable energy from solar and wind sources, thus creating supporting infrastructure for Sri Lanka's target of generati...

Dubbed the nation's first "Water Battery," the 600 MW facility will store excess renewable energy from solar
