The Eswatini Energy Regulatory Authority (ESERA) is finalising the procurement of 75 MW solar PV and 40 MW Biomass which will increase the share of renewables in the electricity mix

At Solarvance, we provide resilient, easy-to-deploy solar systems tailored to Eswatini's varied climate--from humid highlands to dry lowveld. Whether you're powering a village school, a ...

The Kingdom of Eswatini, formerly known as Swaziland, has began the procurement process for 40 MW of PV capacity. The projects, which will be assigned by 2020, will also ...

The Kingdom of Eswatini, formerly known as Swaziland, has began the procurement process for 40 MW of PV capacity. The projects, ...

Eswatini's abundant sunshine makes it an ideal candidate for harnessing this clean, renewable resource. Solar power offers a pathway to energy independence, reducing ...

Photovoltaic (PV) solar cells are increasingly prominent sources of small-scale electricity production in Eswatini. The government actively encourages the adoption of solar ...

Photovoltaic (PV) solar cells are increasingly prominent ...

Contribution to Climate Goals: Eswatini's Nationally Determined Contributions (NDCs) under the Paris Agreement aims to increase renewable energy to 70% by 2034, reduce GHG emissions ...

Through sustained investment in solar, wind, and biomass projects, Eswatini stands poised to emerge as a regional pioneer in renewable energy and fulfil its ambitious energy goals by 2034.

It seeks to link growth and development with Eswatini's Nationally Determined Contributions (NDC) pledge to generate 50% of its energy from renewable sources by 2030, ...

It seeks to link growth and development with Eswatini's Nationally Determined Contributions (NDC) pledge to generate 50% of its ...

In the heart of the Southern African plains lies Eswatini, a small landlocked country formerly known as Swaziland. A nation that has long relied on neighboring South Africa and ...
